SIGTRAINING

Course Overview:

Training needs analysis allows you to directly link the skills needed within the organisation with your current skill level. This five day Training Needs Analysis training course will equip you with the skills required to carry out a training needs analysis. You will be able to make recommendations and implement findings to ensure a good return on your training investment.

Designing Training Needs Analysis Course Objectives:

After this designing training needs analysis training course, delegates will be able to:

- Prepare a plan for the identification of current and future training needs.
- Select and use information-gathering techniques effectively.
- Analyse the information to prioritise training needs.
- Produce a training plan showing solutions, priorities and benefit projections.
- Understand the direct correlation between building competencies and training
